

Health Science Guided Major Electives

Health Science majors should choose 2000 level or higher courses that will align with their career goals. Students have, in the past, chosen courses in areas such as:

- | | |
|---|-------------|
| • Exercise Science and Sports Medicine | KINS |
| • Marketing | MKTG |
| • Child and Family Development | CHFD |
| • Nutrition and Food Science | NTFS |
| • Public Relations | PRCA |
| • Psychology | PSYC |
| • Political Science / Public Administration | POLS / PBAD |
| • Sociology | SOCI |
| • Anthropology | ANTH |
| • African American Studies | AAST |
| • International Studies | INTS |

Course descriptions can be found in our Catalog (available online at www.collegesource.org). If your goal is to attend graduate school you may choose courses required by the program in which you would like to matriculate but which may not already be included in your program study. The Doctor of Physical Therapy Program at the Medical College of Georgia for instance, currently requires a full year of physics (<http://www.mcg.edu/sah/pt/>).

The webpage for Board of Regents of University System of Georgia has links to all Georgia System Institutions' websites (<http://www.usg.edu/inst/>). Non-system schools can be located using any standard search engine like Google (www.google.com).

Please talk with your SSC or faculty advisor about courses which will augment your career plans!
